Program Student Learning Outcomes

Upon completion of this degree from KSU, candidates will be able to:

- Demonstrate knowledge and understanding of children’s development through all domains including cognitive, physical, social and emotional, and linguistically, and as well as application of theory as it relates to each developmental stage.
- Demonstrate knowledge of characteristics of young learners with diverse learning needs (including dyslexia and related disorders) and strategies to work with those needs.
- Develop the knowledge and skills to engage and collaborate with diverse families and the community to support the learning of young children.
- Create and implement learning and development experiences that foster healthy and supportive learning at home and in early learning environments.
- Design learning environments that offer materials (including technology), routines, management techniques, and activities that are developmentally and culturally/contextually appropriate for young children.
- Design and use a variety of assessment techniques that are developmentally and culturally/contextually appropriate for young children.
- Plan, teach, and assess learning activities for young children with diverse learning needs.
- Provide appropriate feedback to young learners with diverse learning needs.
