<b>Program:</b>	Public Health, BS

**Program Student Learning Outcomes**

Upon completion of this degree from KSU, students will be able to:

- Analyze the social, behavioral, environmental, ethical, and multicultural determinants of health status that contribute to health disparities.
- Apply theories, models, and strategies for planning and implementing ethically sound public health education programs.
- Apply methods for evaluating the effectiveness of public health education programs.
- Examine the impact of health care systems and public health policy on population health.
- Analyze public health data to provide evidence-informed interventions or research products.
- Collaborate with other health professionals to improve the health status of individuals and communities.
- Evaluate health information to ensure it is accurate, evidence-informed, and current.
