<b>Program:</b>	Family Care Nurse Practitioner, MSN

### **Program Student Learning Outcomes**

Upon completion of this degree from KSU, students will be able to:

- Synthesize knowledge from nursing, related sciences, and humanities, including culturally appropriate concepts, in the implementation of advanced practice nursing to improve care outcomes in primary care settings.
- Integrate social, economic, ethical, legal, and cultural influences in the planning, delivery, management, and evaluation of potential and actual health care problems for individuals and families across the lifespan.
- Implement patient/family-centered evidence-based clinical prevention strategies for health promotion.
- Apply professional and collaborative communication skills to improve patient self-care and to expedite the coordination of services and interprofessional referrals across a variety of settings.
- Employ informatics and healthcare technologies in the delivery, integration, and coordination of care for individuals and families.
- Employ leadership and advocacy skills in the implementation of ethical and critical collaborative decision-making to improve quality and safety care outcomes for individuals and families in a variety of settings.
- Translate evidence-based knowledge into practice by applying research outcomes to influence health care policy health care delivery, and care outcomes in a variety of practice settings.
