Portfolio Statement:
In the Instructional Technology program at KSU, candidates are required to complete an electronic portfolio. A portfolio is an organized, goal driven documentation of a candidate's professional growth and achievement experience. Although it is a collection of documents, a portfolio is tangible evidence of a wide range of knowledge, skills, and dispositions that a candidate possess as a growing professional (Campbell, Cignetti, Melenyzer, Nettles, & Wyman, 2001). The portfolio serves to demonstrate the candidate's mastery of the PSC Instructional Technology standards and the ISTE NETS-C for Technology Coaches standards. For complete details on the portfolio requirement, please consult the Portfolio Handbook on the Instructional Technology Departmental website.
