This course examines communication about end of life (EoL) in various contexts – from interpersonal to mediated contexts, from local to global contexts. Swifties, Taylor's fans, embraced football, and the Chiefs accepted Swift as a member of the Chief Kingdom so much so that Kansas City registered the highest viewership of the 2024 Grammys. HON 2400/12 (0 credit hours)	Honors Discovery - The Invention of Horror: Gothic Fiction from the Romantic to the Weird	 17213	 Kate Matheny	 TH: 5:00pm– 7:00pm (Kennesaw) (7- week II)
<p>Where did modern horror come from, and why do we keep seeking it out, even when it scares us? This course explores the gothic, supernatural, and "weird" fiction of the 1760s through 1930s to trace the development of early horror and the narrative features and tropes that are its legacy. The American and British literature of this period is filled with a lot of now-familiar creatures -- including vampires, ghosts, mummies, and werewolves -- and just as many human beings behaving badly: making Faustian bargains, engaging in mad science, and committing every one of the seven deadly sins. From the late 18th c. Gothic romances Jane Austen parodied in <i>Northanger Abbey</i> (1817) to the early 20th c. stories of existential, sometimes tentacled horror, we will sample works both famous and forgotten on our way to understanding where the horror impulse comes from and just what makes a story both unnerving and unforgettable. Some reading is required, but this is primarily an introduction to the subject, with recommendations for further reading.</p>

HON 2400/14 (0 credit hours)	Honors Discovery - Save One Life: Resistance and the Holocaust	17223	Catherine Lewis	W: 12:30pm– 2:30pm (Kennesaw) (7- week I)
The Holocaust happened because the Nazis used violence to target their victims and propaganda to convince people to go along with them. Yet, there were many who pushed back against this powerful and murderous regime. Ordinary people took great risks to save themselves, their family, friends, and strangers. People resisted in different ways. The "how" of resistance depended on who was resisting. Their resources and their networks mattered. So did the impact of the war on the country where they lived. This class will examine a range of resistance activities in multiple countries to examine how people fought against Nazi ideology, helped the Allies, and saved many lives. This class will coincide with the opening of the Museum of History and Holocaust Education's newest exhibition, "Save One Life: Resistance and the Holocaust."

existing knowledge and perceptions of AI, particularly generative AI, we delve into the complexities of misinformation and its various forms, including fake news, deep fakes, and biases in political, health, and conspiracy contexts. The curriculum then shifts to an in-depth analysis of popular AI tools, evaluating their reliability, data sources, and safeguards, while also addressing common AI fallacies and developing crucial source evaluation strategies. The course concludes with a focused examination of AI-generated images, teaching students how to identify manipulated visuals and considering the ethical implications of such technology in spreading misinformation. Throughout, students will engage with current readings on AI ethics and misinformation, fostering a comprehensive understanding of these critical issues in our increasingly AI-driven world.
