

Pocket version of the Interactive Research Methods Lab

1. Print this dodecahedron template on A4/US letter paper with a weight of 160-300 gsm.
2. Trim the shape, fold the flaps and mount the dodecahedron using glue.
3. Download and install the Metaverse App in your cell phone/tablet.
4. Open the App, point your device to the augmented reality codes and start using this "IRML pocket Lab."
