

# SPCEET Seminar Series

The Southern Polytechnic College of Engineering and Engineering Technology (SPCEET) Seminar Series is designed to encourage the exchange of ideas within and across the college's disciplines through research. We invite speakers from top research institutions and within SPCEET to give presentations on their ongoing and most recently completed research projects each semester.

The Seminar Series provides faculty, staff, and students an excellent opportunity to directly interact with leaders in their research areas, get valuable feedback on their ongoing work from peers, and create possibilities for high-impact collaboration.

## Fall 2023 Research Seminars

Seminars will take place from 11:15 am - 12:15 am. Light refreshments will be provided.
